F&Q

- A. First use, connect the LEDs to the power supply, correct AC&DC connection, but the LEDs are not light or other fault condition.
- Q. Cut the AC input, check whether there are any poor contacts in the AC and DC terminals.
- A. Correct connection, the LEDs is on but the brightness is too strong/too weak/flashing.
- Q. Cut the AC input, check whether over load or short circuit.
